  - I. Claims 1-3, drawn to identifying ships that cause an environmental spill, classified in class 701, subclass 21.
  - II. Claims 4 and 5, drawn to remote tracking to aid in search and rescue, classified in class 701, subclass 117.
  - III. Claim 6, drawn to projecting the progress of a ship (ETA), classified in class 701, subclass 204.
2. The inventions are distinct, each from the other for the following reasons: Each invention is directed to a different purpose and produce different results. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for each Group is different, restriction for examination purposes as indicated is proper.
